

STATUS OF THE SEWER PROJECT

At the most recent Central Lake Region Sanitary District (CLRSD) board meeting, held last Thursday March 5, 2009, a resolution was made to have John Kolb, CLRSD attorney, draw up a, "Resolution of intent to dissolve the CLRSD" & make it available to the board shortly. A special board meeting will be held before next month's regular CLRSD meeting to approve the resolution. John said if all progresses smoothly, the dissolution should be accomplished by 9/09. As part of the dissolution process, a copy of the resolution to dissolve will be sent to all property owners in the CLRSD district.

A decision hasn't been made as to how the total CLRSD liabilities (of approximately \$3.4 million) will be paid off. Four scenarios were laid out by attorney John Kolb. A subcommittee may be formed to make suggestions as to which is the best scenario. There are assets involved, but the exact amount of assets is yet to be determined. These assets include the land for the treatment plant, permit, easements, engineering plans and specs, etc.

A motion was made during the meeting & passed to send a letter to ALASD rescinding CLRSD's agreement with them to process the effluent from Lobster Lake.

Representative Torrey Westrom has introduced a bill, HF1501, for the dissolving of the district. For more information on status of bill go to Minnesota Legislature and search for this bill.

As more information is available, we'll post it on this website
