Explore the use of rain gardens to decrease runoff, improve water quality and enhance the landscape.

This workshop will be great for landscapers, developers, homeowners, and lake association members alike. Practical information will be shared about storm water retention, water quality, gardening with native plants, and designing your own rain garden.

Guest Speakers:

*Gregg Thompson*

Landscape Rehabilitation Specialist,

Association of Metropolitan Soil and Water Conservation Districts

*Lindy Ekola*

Shoreland Habitat Specialist,  
Department of Natural Resources
