BUFFERS**

**LEARN HOW TO LANDSCAPE YOUR
SHORELINE TO BENEFIT THE LAKE**

Public Works Building

Alexandria, MN

Friday, July 17, 2009

10 am - 4 pm

Shoreland Revegetation

Shoreland Buffers

In this workshop, we will discuss:

- ◆ Environmental, property owner, and regulatory perspectives
- ◆ Simple site designs
- ◆ Plant selection
- ◆ Basic site preparation
- ◆ Planting, permits, and maintenance

For more information on the content of this workshop, contact:

Karen Terry
Extension Educator
University of Minnesota Extension
kterry@umn.edu
218-998-3927

Learn how to protect and enhance your shoreline. This workshop will emphasize a holistic approach—addressing property owners' expectations, the beneficial functions of natural shorelines, and shoreland regulations—which will enable you to make sound shoreland management decisions and implement shoreland revegetation projects.

Shoreland Buffers

During this one-day workshop, you will learn the hows-and-whys of shoreland revegetation and design a simple, lake-friendly shoreland landscape project. Another workshop, to be held later this summer, will give participants the chance to participate in installing a shoreland buffer.

Who should attend:

- ◆ Shoreland property owners
- ◆ Lake association leaders
- ◆ Natural resource professionals
- ◆ Local units of government
- ◆ Master Gardeners
- ◆ Master Naturalists

Funding for this workshop is provided through a grant received from the Minnesota Department of Natural Resources — Shoreland Habitat Program.

REGISTRATION

Tear off and use the form on the other side of this brochure to register by mail.
